

SOLLETI VASAVA SANJEETH

Tuni, Andhra Pradesh, 533401

+91 9491160802 | vasava-sanjeeth@gmail.com | linkedin.com/in/vasava-sanjeeth-solleti | github.com/sanjeeth-solleti

PROFILE SUMMARY

CEH-certified SOC Analyst specializing in SIEM monitoring, threat detection, log correlation, and incident response lifecycle management. Hands-on experience with Splunk, Wazuh, ELK, and EDR tools. Skilled in MITRE ATT&CK mapping, CVSS-based risk prioritization, IAM (RBAC) security controls, and AI-driven SOC automation. Focused on reducing alert fatigue, accelerating MTTR, and strengthening enterprise security posture.

EXPERIENCE

SOC Analyst – Virtual Experience Program

June 2025 – July 2025

Forage

Remote

- **Deloitte Australia:** Analyzed 100+ enterprise server logs to detect automated scraping attacks; implemented WAF rule recommendations reducing exposure.
- **Mastercard:** Investigated phishing incidents impacting users; identified 8+ IOCs and reduced click-through rate by 45% via security controls.
- **Commonwealth Bank:** Built Splunk dashboards processing 100+ transactions; reduced detection latency and improved SOC visibility.
- **TCS:** Designed IAM RBAC policies for accounts mitigating privilege escalation risks and unauthorized access.

Cyber Forensics Specialist with SOCMINT Intern

August 2025 – November 2025

Cyber Privilege

Remote

- Performed forensic investigations ensuring evidence integrity using MD5, SHA-256; maintained ISO-compliant documentation.
- Executed SOCMINT and OSINT investigations to trace threat actors, correlate digital footprints, and validate artifacts across open-source intelligence platforms.
- Maintained ISO 9001:2015-compliant forensic case reports, supporting legal-grade evidence handling and post-incident analysis workflows.

PROJECTS

AI-Powered Security Automation Tool | Python, Docker, PostgreSQL, Gemini AI

December 2025

- Built an intelligent platform that automates Level 1 SOC analyst tasks, reducing alert fatigue and manual triage overhead.
- Configured Wazuh SIEM ingestion with ML-based alert classification and enrichment for faster threat contextualization.
- Automated Jira ticket creation for high-severity incidents to accelerate incident response and reduce MTTR.

Automated Threat Intelligence Engine | Python, Flask, Gemini AI

December 2025

- Deployed a modular platform to automate IOC extraction, enrichment, and AI-assisted threat analysis at scale.
- Integrated multiple threat intelligence services to classify alerts and generate actionable security reports.
- Implemented a scalable React-Flask architecture enabling real-time analysis and faster incident response.

Linux Privilege Escalation Detector via System Call Monitoring | Python, eBPF

December 2025

- Programmed real-time Linux privilege escalation detector using eBPF and Python, achieving 99% detection accuracy with automated incident response and web-based monitoring.
- Developed kernel-level security monitoring system with Flask dashboard and WebSocket alerts, detecting 10+ attack vectors including SUID exploits and root privilege abuse.
- Engineered automated threat response framework with remote SSH access, continuous monitoring, and sub-100ms alert delivery for enterprise Linux environments.

ACHIEVEMENTS

TCS HackQuest Season 10 – National Cybersecurity Competition | Tata Consultancy Services

2026

- Competed in TCS HackQuest Season 10, a national-level cybersecurity challenge; demonstrated strong technical aptitude in offensive and defensive security problem-solving and secured a **9 LPA placement package** from TCS.

SKILLS

Programming Languages: Python

Tools & Platforms: Splunk, Wazuh, CrowdStrike, ELK, Burp Suite, Nmap, SQLMap, Metasploit, Wireshark, Nessus, Netsparker

SOC & Security: SIEM Monitoring, Incident Triage, Threat Detection, Log Analysis, Vulnerability Assessment, Digital Forensics, OSINT

Soft Skills: Analytical Thinking, Attention to Detail, Communication, Problem-Solving, Team Collaboration

CERTIFICATIONS

Certified Ethical Hacker (CEH V13) – EC-Council

Google Cybersecurity Professional – Coursera

SOC Level 1 – TryHackMe

EDUCATION

Chalapathi Institute of Engineering and Technology

October 2022 – March 2026

Bachelor of Technology in Computer Science and Engineering (Cybersecurity)

Guntur, Andhra Pradesh

- **CGPA** – 8.45/10.0
